Dimond Madechawo

Website developer

I'm a website developer with knowledge and experience in modern web development. I'm looking for an opportunity to utilize my skills and experience that i have acquired over the past years as website developer.

Experience

Entrepreneur

Furniture and cosmetics

2017 - Current

It's my passion to take full advantage of the web industry technology. Over the past seven years in enterprise i have noticed that access to information is vital and the internet is cheap but can generate great profits, I've tried it and failed to breakthrough. I cloned Twitter and renamed it, i created a voting system and now i'm creating an HTML 5/ CSS 3 development course:

<https://rb.gy/w5kuu0>

I noticed that development is not all about creating great big programs but is much about a great team contribution to solve everyone's problems.

Education

Advanced level

Mashville college

2010 - 2015

After finishing my Ordinary level in 2013 where i basically did all essential subjects, i went on and did Advanced level Business studies and Economics. Later i started learning software development from PDFs that was around 2018.

Skills

I'm comfortable with HTML 5/CSS 3, Javascript, Bootstrap, jQuery, Vue and UI/UX development. If the need arises i'm also useful in PHP/MySQL and Graphics designing.
